Customers can set budget limits and notification preferences

The screenshot shows the Customer Portal interface. The top navigation bar includes links for Home, Consumption, Messages, Contact, and Settings. The Messages section displays a list of messages with columns for Subject, Date, and Content. The Contact utility section is highlighted, showing a form for sending a message to the utility. A callout box points to the 'Contact the Utility directly' button. Below the form is a 'List of previous messages' section showing a 'Leak Alert' with a question and response.

Leak Alert

Question How do you recommend I find the leak?
10/04/2016 00:12

Response Hello and thank for your message. We recommend you take a look at the read on your meter then close any water source on your property. Take a look at the reading on the meter afterwards and if any usage has occurred, try to find another source that might be consuming water (toilet, outdoor faucet, dripping sink, etc). If you still cannot locate a source, we suggest you contact a plumber to investigate further.

Average consumption 189 gallons

Private consumption 245 gallons

Alert Types

My water advisor allows you to get direct alerts to help you conserve water and save money :

- **Suspected leak-** an alert sent by the meter when a continuous 24 hour water consumption is detected.
- **Consumption above average-** irregular water use compared to your same period's average last year.
- **Consumption above maximum-** water use above your consumer-defined limit
- **Consumption while absent-** you can define an absence time or a holiday time to get an alert about water use during that period.
